

Media Release 6/2016

Zehnder ComfoAir Q – market launch of the new generation of central ventilation units

Gränichen/Switzerland, 1 June 2016 – With Zehnder ComfoAir Q, Zehnder Group is launching a new model range of central ventilation units which will set new standards in terms of energy efficiency, ease of use, design and very quiet operation.

The new ComfoAir Q model range is made up of three units, offering an air conveyance of 350, 450 or 600 m³/h. It will progressively replace the successful ComfoAir 350/550 models and is winning over customers with its outstanding performance, particularly in terms of superior energy efficiency results. Energy consumption has been significantly reduced once again and the Zehnder ComfoAir Q ventilation units make very little noise. A new, patented filter concept also ensures the highest possible level of hygiene in the unit and air distribution system.

Last but not least, the new flagship of Zehnder indoor ventilation also impresses with its completely restyled housing – intelligent building services combined with state-of-the-art design and intuitive operation. A real-time display on the unit for all relevant operation data makes the user more aware of: energy consumption, comfort and environmental issues. The units can either be operated via a display on the unit or via an app.

The market launch of Zehnder ComfoAir Q ventilation is set to commence in Belgium in June 2016. The products will be available in Germany, the Netherlands, Poland and the United Kingdom from July 2016. Italy and France will follow in September and October 2016 respectively. The new ventilation units will be introduced in Switzerland in January 2017.

Zehnder ComfoAir Q ventilation emphasises Zehnder Group's claim of being a leader in terms of comfortable indoor ventilation.

Zehnder ComfoAir Q – even quieter, more efficient and more intelligent!

The new Zehnder ComfoAir Q central comfort ventilation will progressively replace the classic Zehnder ComfoAir 350/550 series. The new model range requires much less power and recovers significantly more heat.

Thanks to the three new, optimal class sizes of the Zehnder ComfoAir Q ventilation, with a maximum air conveyance of 350 m³/h, 450 m³/h or 600 m³/h, the new series is equally suitable for use in single-family homes, apartments, offices and commercial buildings.

Zehnder ComfoAir Q ventilation's intuitive display offers real-time data on all relevant operation parameters, increasing the awareness of the user of: energy consumption, comfort and environmental issues. The unit can be controlled from either the traditional three-position switch or via an app, and also lets you know when it is time to replace the filter.
